

Monitoring Student Progress in the Classroom to Enhance Teaching Planning and Student Learning

Lynn S. Fuchs

Vanderbilt University

Progress Monitoring

- Teachers assess students' academic performance, using brief measures, on a frequent basis

Different Forms of Progress Monitoring

Curriculum-Based Assessment (Tucker; Burns)

Find instructional level

Mastery Measurement (Precision Teaching, WIDS)

Tracks short-term mastery of a series of instructional objectives

Curriculum-Based Measurement

Focus of This Presentation

Curriculum-Based Measurement

*the scientifically validated form of
progress monitoring*

Teachers Use CBM to ...

- Describe academic competence at a single point in time
- Quantify the rate at which students develop academic competence over time
- Build more effective programs to increase student achievement

Curriculum-Based Measurement (CBM) . . .

- Result of 30+ years of research
- In the United States, CBM is a **signature feature of quality special education** and increasingly is used within RTI.
- Demonstrates strong reliability, validity, and instructional utility

Research Shows

- CBM produces accurate, meaningful information about students' academic levels and their rates of improvement.
- CBM is sensitive to student improvement.
- CBM corresponds well with high-stakes tests.
- When teachers use CBM to inform their instructional decisions, students achieve better.

Most Progress Monitoring: Mastery Measurement

CBM is NOT

Mastery Measurement

MASTERY MEASUREMENT

Tracks Mastery of Short-term Instructional Objectives

To implement Mastery Measurement,
the teacher

- Determines the sequence of skills in an instructional hierarchy
- For each skill, develops a criterion-referenced test

Hypothetical Fourth-Grade Math Computation Curriculum

1. *Multidigit addition with regrouping*
2. Multidigit subtraction with regrouping
3. Multiplication facts, factors to 9
4. Multiply 2-digit numbers by a 1-digit number
5. Multiply 2-digit numbers by a 2-digit number
6. Division facts, divisors to 9
7. Divide 2-digit numbers by a 1-digit number
8. Divide 3-digit numbers by a 1-digit number
9. Add/subtract simple fractions, like denominators
10. Add/subtract whole number and mixed number

Multidigit Addition Mastery Test

Name: _____ Date _____

Adding

$$\begin{array}{r} 36521 \\ + 63758 \\ \hline \end{array}$$

$$\begin{array}{r} 53429 \\ + 63421 \\ \hline \end{array}$$

$$\begin{array}{r} 84525 \\ + 75632 \\ \hline \end{array}$$

$$\begin{array}{r} 67842 \\ + 53937 \\ \hline \end{array}$$

$$\begin{array}{r} 57321 \\ + 46391 \\ \hline \end{array}$$

$$\begin{array}{r} 56382 \\ + 94742 \\ \hline \end{array}$$

$$\begin{array}{r} 36422 \\ + 57529 \\ \hline \end{array}$$

$$\begin{array}{r} 34824 \\ + 69426 \\ \hline \end{array}$$

$$\begin{array}{r} 32415 \\ + 85439 \\ \hline \end{array}$$

$$\begin{array}{r} 45321 \\ + 86274 \\ \hline \end{array}$$

Mastery of Multidigit Addition

Hypothetical Fourth-Grade Math Computation Curriculum

1. Multidigit addition with regrouping
2. *Multidigit subtraction with regrouping*
3. Multiplication facts, factors to 9
4. Multiply 2-digit numbers by a 1-digit number
5. Multiply 2-digit numbers by a 2-digit number
6. Division facts, divisors to 9
7. Divide 2-digit numbers by a 1-digit number
8. Divide 3-digit numbers by a 1-digit number
9. Add/subtract simple fractions, like denominators
10. Add/subtract whole number and mixed number

Multidigit Subtraction Mastery Test

Name: _____ Date _____

Subtracting

$$\begin{array}{r} 6521 \\ - 375 \\ \hline \end{array}$$

$$\begin{array}{r} 5429 \\ - 634 \\ \hline \end{array}$$

$$\begin{array}{r} 8455 \\ - 756 \\ \hline \end{array}$$

$$\begin{array}{r} 6782 \\ - 937 \\ \hline \end{array}$$

$$\begin{array}{r} 7321 \\ - 391 \\ \hline \end{array}$$

$$\begin{array}{r} 5682 \\ - 942 \\ \hline \end{array}$$

$$\begin{array}{r} 6422 \\ - 529 \\ \hline \end{array}$$

$$\begin{array}{r} 3484 \\ - 426 \\ \hline \end{array}$$

$$\begin{array}{r} 2415 \\ - 854 \\ \hline \end{array}$$

$$\begin{array}{r} 4321 \\ - 874 \\ \hline \end{array}$$

Mastery of Multidigit Addition and Subtraction

Problems with Mastery Measurement

- Hierarchy of skills is logical, not empirical.
- Performance on single-skill assessments can be misleading.
- Assessment does not reflect maintenance or generalization.
- Assessment is designed by teachers or sold with textbooks, with unknown reliability and validity.
- Number of objectives mastered does not relate well to performance on high-stakes tests.

Curriculum-Based Measurement
(CBM) was designed to address
these problems.

An Example of CBM:
Math Computation

Hypothetical Fourth-Grade Math Computation Curriculum

Multidigit addition with regrouping

Multidigit subtraction with regrouping

Multiplication facts, factors to 9

Multiply 2-digit numbers by a 1-digit number

Multiply 2-digit numbers by a 2-digit number

Division facts, divisors to 9

Divide 2-digit numbers by a 1-digit number

Divide 3-digit numbers by a 1-digit number

Add/subtract simple fractions, like denominators

Add/subtract whole number and mixed number

- Random numerals within problems
- Random placement of problem types on page

Donald's Progress in Digits Correct Across the School Year

(1)

Write the letter in each blank.

- _____ z (A) line segment
 _____ ← K → (B) line
 _____ M → N (C) point
 _____ (D) ray

(2)

Look at this numbers.:

356.17

Which number is in the hundredths place? _____

(3)

Solve the problem by estimating the sum or difference to the nearest ten.

Jeff wheels his wheelchair for 33 hours a week at school and for 28 hours a week in his neighborhood. About how many hours does Jeff spend each week wheeling his wheelchair?

(4)

Write the number in each blank.

3 ten thousands, 6 hundreds, 8 ones

2 thousands, 8 hundreds, 4 tens, 6 ones

(5)

Write a number in the blank.

1 week = _____ days

(6)

Vacation Plans for Summit School Students

Number of Students

Use the bar graph to answer the questions.

The P.T.A. will buy a Summit School T-Shirt for each student who goes to summer school. Each shirt costs \$4.00. How much money will the P.T.A. spend on these T shirts? \$ _____ .00

How many students are planning to travel during the summer? _____

How many fewer students are planning to go to summer school than planning to stay home? _____

(7)

To measure the distance of the bus ride from school to your house you would use

- _____ (A) meters
 _____ (B) centimeters
 _____ (C) kilometers

One page of a 3-page CBM in math concepts and applications (24 total problems)

Kindergarten

Column B

(1)

Use the graph to answer the questions.

How many words did Rachel spell correctly on Monday? _____

Rachel's friend Latasha spelled 3 times as many words correctly as Rachel did on Monday. How many words did Latasha spell correctly? _____

How many more words did Rachel spell correctly on Friday than on Monday? _____

(2)

Write a number in the blank.

1 hour = _____ minutes

(3)

Look at this number.

8,301

Which digit is in the hundreds place? _____

Which digit is in the thousands place? _____

(4)

Write the letter in each blank.

_____  (A) line

_____  (B) point

_____  (C) ray

_____  (D) line segment

(5)

Write the number in each blank.

$$\begin{array}{r} 4 \text{ R}1 \\ 2 \overline{) 9} \end{array}$$

The divisor is _____.

The dividend is _____.

The quotient is _____.

(6)

Complete the sequence.

51, 45, 39, _____, _____

(7)

Solve the problem by estimating the sum or difference to the nearest hundred.

The Jiffy Food Market sells 781 cartons of plain milk each week and 623 cartons of chocolate milk. About how many fewer cartons of chocolate milk are sold than plain milk?

Name: _____

Date: _____

<p>A</p> $\begin{array}{r} 47785 \\ 3335 \\ 4360 \\ + 148 \\ \hline \end{array}$	<p>B</p> $\begin{array}{r} 605 \\ \times 38 \\ \hline \end{array}$	<p>C</p> <p>Rename as a mixed number:</p> $\frac{22}{5} =$	<p>D</p> $3\frac{2}{5} + 2\frac{4}{5} =$	<p>E</p> $\frac{1}{3} + \frac{1}{4} =$

Column B

(1)

Write the number in the blank.

seven hundred eighty thousand,
two hundred fifteen

(2)

Tom went to the movies and bought popcorn for \$2.50, a drink for \$1.25, and a box of candy for \$1.75. He gave the clerk a \$10.00 bill and received change in the least number of bills and coins. How many of each were there? (If none, write the number zero.)

___ \$5 bills ___ \$1 bills ___ quarters

(3)

Find the average of these numbers.

19, 7, 12, 8, 9

Arithmetic mean = _____

(4)

Area of triangle = $\frac{1}{2} \times \text{base} \times \text{height}$ 

Area = _____ sq. in.

(5)

Write the number for the Roman numeral in the blank.

_____ CCXL

(6)

Tickets Sold for Baseball at
Crow Valley Stadium

Write your answer to the nearest hundred.

Crow Valley Stadium has 600 seats. If all the people who buy tickets on Monday attend the game, about how many seats will be empty?

Crow Valley Stadium will sell the remaining tickets for Tuesday's game at the gate for \$2.00. If they sell all the remaining tickets, how much money will they get?

\$ _____ .00

(7)

Round to the nearest thousand:

44,201 _____

Name: _____

Column A

Applications 6

Column B

(1)

Write **P** if the number is a prime number and **C** if the number is a composite number.

___ 2 ___ 94

(2)

$$7^2 = \underline{\quad}$$

(3)

When Emily woke up, the temperature was 42°F . By how many degrees did the temperature fall?

_____ $^{\circ}\text{F}$

(4)

Which expression matches the phrase:

The difference between y and 19?

(A) $y - 19$

(B) $\frac{19}{y}$

_____ (C) $y + 19$

If $y = 25$, then the value of the expression is _____

(5)

Rename if necessary.

$$\begin{array}{r} 3\text{ m } 92\text{ cm} \\ + 7\text{ m } 15\text{ cm} \\ \hline \text{___ m ___ cm} \end{array}$$

(6)

15 girls wore pink dresses, 25 wore blue dresses, 7 wore purple dresses and 2 wore green dresses. Write the ratio of green dresses to purple dresses, using the word "to."

(7)

(A) acute

(B) obtuse

(C) right

What kind of triangle? _____

(8)

Express 7% as:

a decimal _____

a fraction with denominator of 100 _____

(9)

2:5 is the same as _____:15

Sampling performance on year-long curriculum for each CBM

- Avoids need to specify a skills hierarchy
- Avoids single-skill tests
- Automatically assesses maintenance/generalization
- Permits standardized procedures for sampling the curriculum, with known reliability and validity
- SO THAT: CBM scores relate well to performance on high-stakes tests

Two CBM Methods for Representing Year-Long Performance

Method #1:

Systematically sample items from the annual curriculum (illustrated in Math CBM, just presented)

Method #2:

Identify a global behavior that simultaneously requires the many skills taught in the annual curriculum (illustrated in Reading CBM, presented next)

Hypothetical Grade 2 Reading Curriculum

- Phonics
 - cvc patterns
 - cvce patterns
 - cvvc patterns . . .
- Sight Vocabulary
- Comprehension
 - Identification of who/what/when/where
 - Identification of main idea
 - Sequence of events
- Fluency

Grade 2 Reading CBM

- Each week, every student reads aloud from a different second-grade passage for 1 minute
- Each week's passage is the same difficulty
- As student reads, teacher marks errors
- Count number of words read correctly
- Graph scores

CBM

- Not interested in making kids read faster
- Interested in kids becoming better readers
- The CBM score is an overall indicator of reading competence
- Students who score high on CBM
 - Are better decoders
 - Are better at sight vocabulary
 - Are better comprehenders
- Correlates highly with high-stakes tests

CBM passage for Correct Words Per Minute

Mom was going to have a baby. Another one! That is all we need thought Samantha who was ten years old. Samantha had two little brothers. They were brats. Now Mom was going to have another one. Samantha wanted to cry.

“I will need your help,” said Mom. “I hope you will keep an eye on the boys while I am gone. You are my big girl!”

Samantha told Mom she would help. She did not want to, thought. The boys were too messy. They left toys everywhere. They were too loud, too. Samantha did not want another baby brother. Two were enough.

Dad took Samantha and her brothers to the hospital. They went to Mom’s room. Mom did not feel good. She had not had the baby. The doctors said it would be later that night. “I want to wait here with you,” said Samantha. “Thank you Samantha. But you need to go home. You will get too sleepy. Go home with Grandma. I will see you in the morning,” said Mom.

That night Samantha was sad. She knew that when the new baby came home that Mom would not have time for her. Mom would spend all of her time with the new baby.

The next day Grandma woke her up. “Your mom had the baby last night,” Grandma said. “We need to go to the hospital. Get ready. Help the boys get ready, too.”

Samantha slowly got ready. She barely had the heart to get dressed. After she finished, she helped the boys. They sure were a pain! And now another one was coming. Oh brother!

Soon they were at the hospital. They walked into Mom’s room. Mom was lying in the bed. Her tummy was much Smaller. Samantha . . .

What We Look For in CBM

INCREASING SCORES:

Student is becoming a better reader.

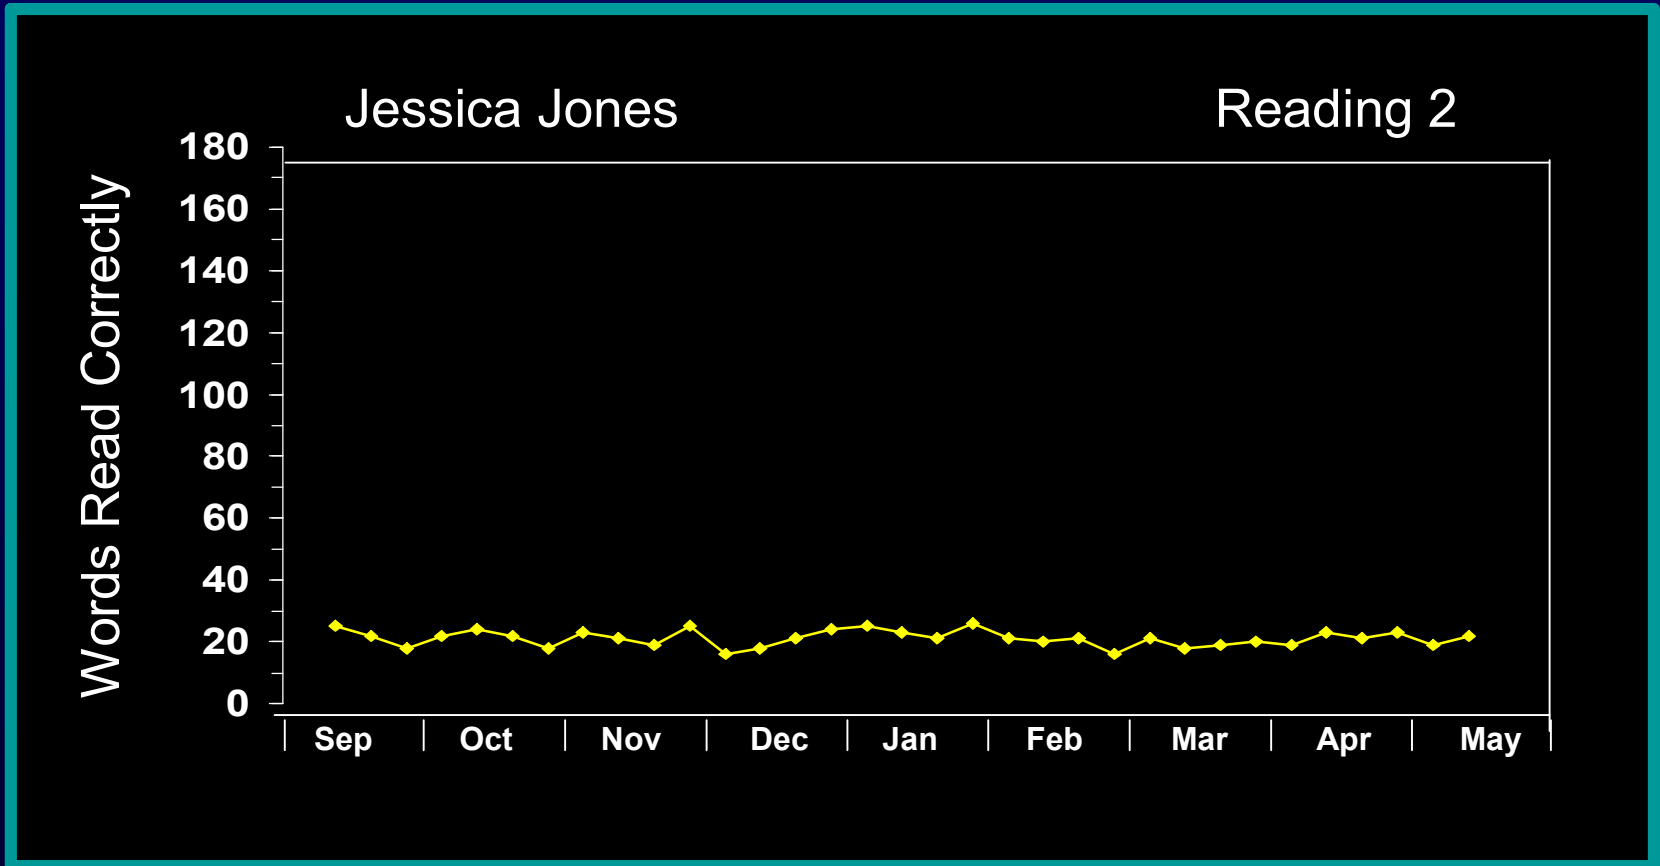

FLAT SCORES:

Student is not profiting from instruction and requires a change in the instructional program.

Sarah's Progress on Words Read Correctly

Jessica's Progress on Words Read Correctly

Reading CBM

- Kindergarten: Letter-Sound Fluency
- Grade 1: Word-Identification Fluency
- Grades 2-3: Passage Reading Fluency
- Grades 4-6: Maze Fluency

Kindergarten

Letter-Sound Fluency

Grades 2-3

Passage Reading Fluency

- Number of words read aloud correctly in 1 minute on end-of-year passages

CBM passage for Correct Words Per Minute

Jason Fry ran home from school. He had to pack his clothes. He was going to the beach. He packed a swimsuit and shorts. He packed tennis shoes and his toys. The Fry family was going to the beach in Florida.

The next morning Jason woke up early. He helped Mom and Dad pack the car, and his sister, Lonnie, helped too. Mom and Dad sat in the front seat. They had maps of the beach. Jason sat in the middle seat with his dog, Ruffie. Lonnie sat in the back and played with her toys.

They had to drive for a long time. Jason looked out the window. He saw farms with animals. Many farms had cows and pigs but some farms had horses. He saw a boy riding a horse. Jason wanted to ride a horse, too. He saw rows of corn growing in the fields. Then Jason saw rows of trees. They were orange trees. He sniffed their yummy smell. Lonnie said she could not wait to taste one. Dad stopped at a fruit market by the side of the road. He bought them each an orange.

Grades 4-6

Maze Fluency

- Number of words replaced correctly in 2.5 minutes on end-of-year passages from which every 7th word has been deleted and replaced with 3 choices

Computer Maze

A SCARY NOISE

Ray lived in Georgia. He was born there and had _____ friends. One day Dad had come home _____ work to say that they would have _____ move far away. Dad worked in _____ factory. The factory had closed and Dad _____ a new job. Dad had found a _____ job and now they had to move.

Ray _____ sad because he did not want _____ leave his school. He did not _____ to leave his friends.

"I am _____, son," said Dad.

"It is OK," _____ Ray with a smile. He did _____ want Dad to feel bad.

They _____ up the car and moved to a _____ state. Their new

Using CBM to Enhance Teaching Plans and Student Learning

Tier 1 (General Education)

1. Screen to identify suspected risk
- **2. Formulate instructional plans
3. Quantify response to confirm risk

Tier 2 (Small-Group Tutoring)

1. Quantify response

Tier 3 (Special Education)

1. Set/Monitor progress toward IEP goals
- **2. Design effective individualized programs
3. Quantify response

At Tier 1: CBM for ALL Weekly Testing Class Reports Every 2 Weeks

- To document student progress
- To catch students not on track for benchmark
- To plan more effective instruction

In general education, the focus is on the class report to enhance instruction for all students and to identify which students are in need of more help.

▣ Cold. Missing most of these words.

▣ Warm. Getting some of these words right.

■ Hot. Getting most of these words right.

MAT/LAST: closed syllable, short vowel, e.g., bed, top, hit, cat bump, mast, damp

TIME: final e, long vowel, e.g., cake, poke, same, woke, mine, rose, gate

CAR: vowel r-controlled, e.g., fur, nor, per, sir, her, tar

BEAT: two vowels together, e.g., soap, maid, lean, loaf, paid, meal

HAPPY: divide between two like consonants, e.g., lesson, bubble, battle, giggle,

PUBLIC: divide between unlike consonants, e.g., elbow, walrun, doctor, victim, admit

RUNNING: dividing between double consonant with suffix, e.g., batter, sipped, hitting, tanned, bitten

-------------------------	---------	-------

Quantifying Response

- So, CBM is used to quantify response to instruction, via slope (weekly rate of improvement), to Tier 1 instruction.
- If slope is inadequate at Tier 1, then student progresses to Tier 2, where CBM is used to assess response to a standard, research-validated tutoring protocol.
- If slope is inadequate to Tier 2 standard protocol, then student progresses to Tier 3, where instruction is inductively formulated with CBM to meet individual needs.
- At Tier 3, CBM is also used to quantify response to formulate decisions about exiting special education, to return students to Tier 1 or Tier 2 as soon as possible.

Using CBM At Tier 3 within Special Education

1. Set IEP goals

**2. Design effective individualized programs

3. Quantify response (return to GE)

Designing Individualized Programs

- Teachers use the graphed scores to monitor student progress toward the goal.

Designing Individualized Programs

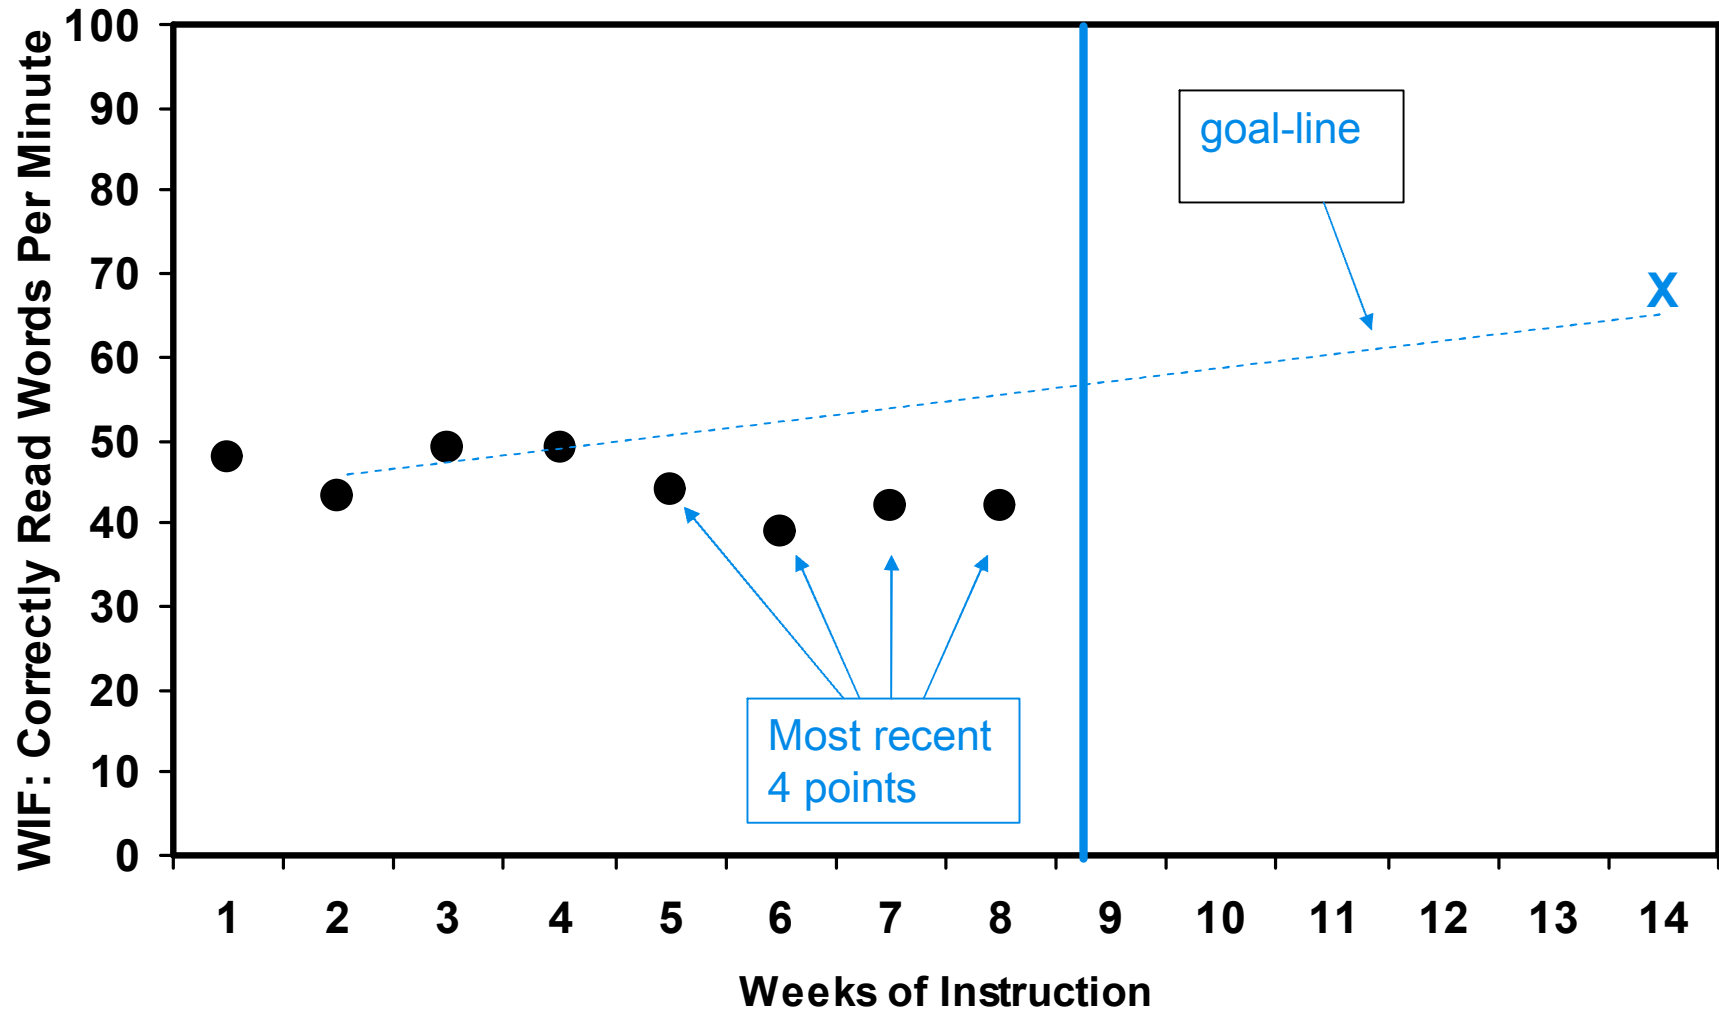

*Based on 4 most recent
consecutive scores*

- If all 4 scores fall above goal-line, increase end-of-year goal.
- If all 4 scores are fall below goal-line, revise instructional program.

Designing Individualized Programs

Designing Individualized Programs

Designing Individualized Programs

- If 4 consecutive scores don't fall above/below goal line, then wait until there are 8 new scores since the last goal or instructional change.
- Based on the 8 new scores, draw a trend line representing student's actual rate of progress.

Designing Individualized Programs

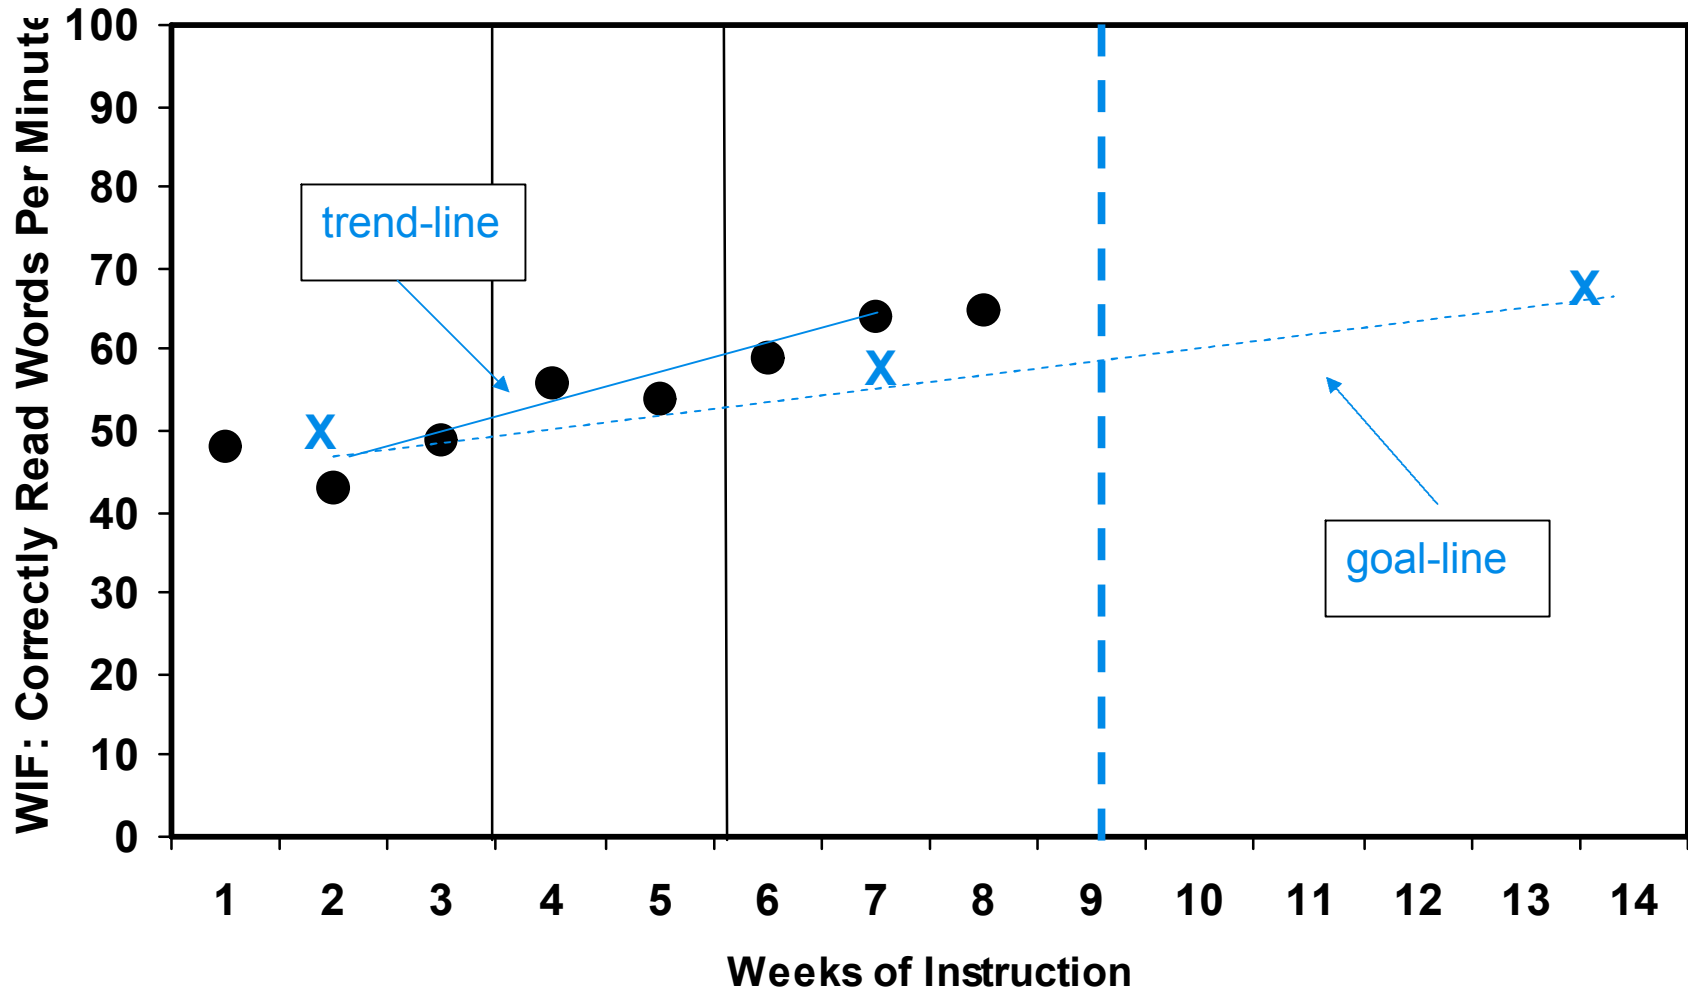

- If working without computer, draw the student's trend-line using the Tukey method (contact flora.murray@vanderbilt.edu for directions).
- CBM computer management programs are available to graph and aid teachers with instructional decisions.
- Various types available for varying fees

Designing Individualized Programs

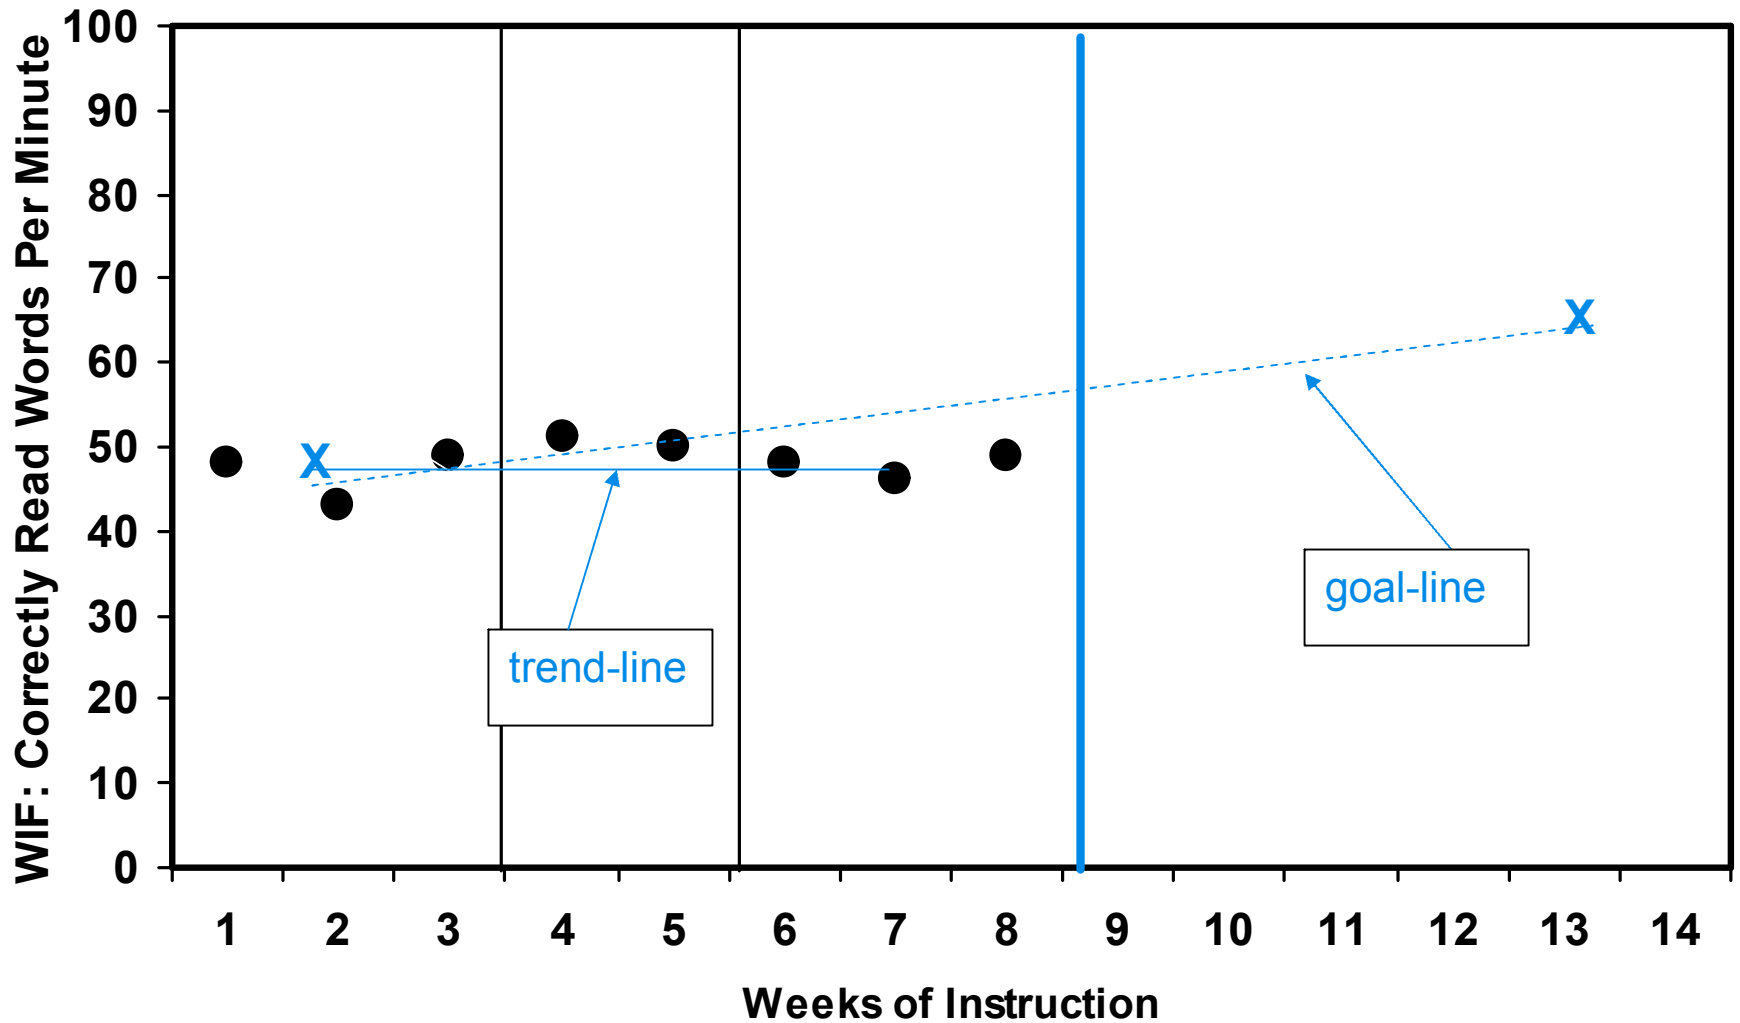

Compare the trend line to the goal line

- If trend line is steeper than goal line, increase goal.
- If trend line is flatter than goal line, revise the instructional program.
- If trend line equals goal line, make no change at that time.

Designing Individualized Programs

Designing Individualized Programs

Special Educators Who Use CBM in This Way

- Design superior instructional programs that are more individualized
- Employ more ambitious goals
- Effect dramatically superior student learning outcomes

These effects have been documented with numerous randomized controlled field studies in reading, math, and spelling.

Effect Sizes When Teachers Use CBM to Guide Instruction

CBM Materials

- McGraw-Hill: Web-based math and reading systems
- Pro-Ed, Inc.: Math computation and concepts/applications tests (Monitoring Basic Skills Progress; you need the “kits” for directions)
- Vanderbilt University: reading tests (flora.murray@vanderbilt.edu)
- www.studentprogress.org

In Sum ..., CBM

- Is a research-validated form of progress monitoring
- Is a signature feature of effective Tier 3 for individualizing instruction for students who do not respond to validated tutoring protocols at Tier 2
- Is essential for documenting response (i.e., improvement) at all three tiers of instruction
